

# LESS GAMBLE, MORE PROFIT

## ALL-NEW 60' A-SERIES APPLICATOR

- Boasts narrow transport width of 11'10" that is 3' narrower than our closest competition - improving transport safety and reducing operator liability on the road
- Low Profile 1,800 or 2,600 gallon tank increases operator visibility from the cab and improves weight distribution
- Don't gamble with your nitrogen, apply it in the ground and eliminate reliance on a timely rainfall after application
- Proven \$63/acre ROI for side-dress application at V3-V6 growth stages vs. 100% pre-plant nitrogen\*\*
